Experience

SOFTWARE ENGINEER | THE REMI GROUP | MAY 2020 – PRESENT

- Used Angular version 12+ with Typescript to create reusable components for our greenfield application
- Created SQL views, GraphQL endpoints, SCSS styling that meets best practice
- Updated the CI/CD pipeline using TeamCity to automate project builds and deployments
- Contributed more than 35% to the completion of 2 modules
- Improved our greenfield application processes so users can efficiently view large data sets, streamline their work steps, and allow fast and secure CRUD operations to be performed
- Documented and updated procedures for speeding up onboarding of new developers
- Worked in an Agile environment using Azure DevOps to maintain user stories and Git repositories

QA AUTOMATION ENGINEER | THE REMI GROUP | SEP 2019 – MAY 2020

- Produced automated end to end test scripts with Cypress using Typescript base on best practices
- Utilized functional testing to identify bugs and reduced occurrence of bugs in production release by 95%
- Optimized tests by creating reusable samples and testing standards for the QA team

HOST | SEOUL FOOD MEAT COMPANY | MAR 2018 – FEB 2019

- Assisted bartenders and wait staffs in maintaining excellent customer service through clear and concise communication and collaboration
- Dictated the flow of the restaurant by organizing and managing table seating for customers

Skills

Languages: TypeScript | HTML | CSS/SCSS | SQL | JavaScript

Technology: Git | MS Azure DevOps | Auth0 | TeamCity | Material UI | MobX

Frameworks: Angular | Cypress | NestJS | NodeJS | GraphQL

Education

B.S IN COMPUTER SCIENCE | UNC CHARLOTTE | DEC 2018

- Concentration in Software Engineering, Minor in Mathematics
